SOFTWARE AS A SERVICE SUBSCRIPTION AGREEMENT
SUBSCRIPTION SERVICES ORDER FORM

This Order Form No. FMOF01.01 is issued under the Software as a Service Subscription Agreement with an effective date of August 1, 2025 (the "Agreement") between **Abbott Laboratories (Singapore) Private Limited** ("Abbott") and **FuturMaster Singapore Pte Ltd** ("Company"). This Order Form is effective as of the last date of signature below. This Order Form, as amended, modified, or supplemented, includes the terms and conditions of the Agreement, which are incorporated by this reference. In the event of any conflict in terms between the Agreement and this Order Form, the Agreement shall prevail unless otherwise expressly stated in this Order Form.

Application Platform Name:	Futurmaster bloom
Project Name:	Alpine
Company Name:	Futurmaster Singapore Pte Ltd
Hosting Provider Name:	AWS
Subscription Services Start Date:	November 2025
Subscription Services End Date:	October 2028
Abbott Project Manager:	Dash Satyakam
Abbott Global Procurement Contact:	Terence Yap
Company Project Manager:	Yvonne Yuan Yvonne.yuan@futurmaster.com
Company Contact:	Vincent Berthou Vberthou@futurmaster.com
Company Technical Contact:	Hanna Maria Theodora hanna.maria.theodora@futurmaster.com
Hosting Location(s) (i.e., location of data center(s)). Include location(s) for primary and backup (failover location(s)):	Primary location: Singapore
Personal Information Data Type(s) (e.g., name, email address, age, salary details, IP address, etc.):	data collected for login purpose: name, login, email, scope of work
Categories of Data Subjects (e.g., customers, employees, patients, health care professionals, suppliers, etc.):	invoice sales data by SKU-distributor
Special Categories of Personal Information (e.g., racial or ethnic origin, religious beliefs, genetic data, health data, etc.)	No Personal Information collected
Origination of Personal Information (list the country(ies) of origin of the Personal Information):	No Personal Information collected
Destination of Personal Information (list the country(ies) the Personal Information goes to or may be accessed from):	No Personal Information collected
Duration (detail the duration of the Processing of Personal Information):	No Personal Information collected

1. Subscription Services Term

   The subscription agreement is established for an initial period of three (3) years, effective from June 2025 to May 2028, subject to termination as provided in the Exit terms.

2. Subscription Services.

   Company's Cloud Services is composed of the following sub-services:

   - Company's Software Access to demand planning module
   - Infrastructure refers to the technical components used by Company to provide access to Service, in compliance with the SLAs agreed between the parties in the SLA Exhibit
   - Infrastructure & software supervision: Company shall be responsible for monitoring the availability of the Service (SLA Exhibit)
   - Upgrade of Company's Standard Software (SLA Exhibit)
   - Technical support (Support Exhibit)

3. Scope

Company's Software Access is composed of the different functional capabilities and users accesses to these capabilities required by Abbott, as described below and in SOW:

High level description of the functionalities covered for this project:

- Create a rolling 28 months forecast multiple level (SKU, Brand, Channel) at monthly bucket.
- Baseline forecast generated through statistical and machine learning model using historical data
- Aggregate information across multiple distributors, territories …
- Split the forecast to distributors / key account
- Load additional information like sell out where available to take into consideration for secondary sales forecast
- IMS/TMS conversion. Convert secondary sales forecast to Primary Sales forecast considering distributor stock levels
- Integrate TPM output information to Company
- Integrate Budget and price to manage financial objectives
- Create forecast segmentation and auto cleansing rules
- Create multiple scenarios and compare them
- Top down and bottom-up forecast validation in quantity/%/value
- Workflow validation and ability to support details comments by user/profile
- Commenting and annotation features for communication within the forecasting platform
- Ability to create reports and dashboard by profile to support analysis and alerts

4. Authorized subcontractors

Company's application will be hosted on Amazon Web Services (AWS), ensuring secure, scalable, and reliable cloud infrastructure for service delivery.

Authorized subcontractors

Business name of Authorized Subcontractor	Acting as data Subprocessor ?
Amazon Web Services	YES

Subprocessors details and location:

Business name of Subprocessor	Details of authorized Subprocessor (legal information and nationality)	Transfer Mechanism if applicable	Nature of subcontracted data processing activities	Location of subcontracted data processing activities
Amazon Web Services EMEA	AWS EMEA SARL - Luxemburg	Data Transfer Contractual Clauses	Data Hosting	South Africa, China, Honk-Kong, Japan, South Korea, India, Singapore, Australia, USA, Bahrein, Brazil, Sweden, Paris, London, Ireland, Italy, Germany, Canada

5. Payment Schedule and Process

This section describes the financial terms of FM SAAS Services for Abbott Nutrition. It is composed of the following elements:

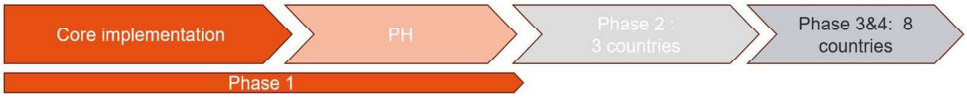
- Volume Pricing Structure
- Projection fees after roll out completion
- Exit terms
- Renewal condition

5.1 Scalable Subscription Pricing Framework

The present Subscription Services incorporate a price estimation framework intended to support a potential global deployment of the solution across the following geographic regions:

- Asia-Pacific (APAC)
- Europe
- Middle East
- Latin America

The initial plan involves deploying the solution across 12 countries within the APAC region, covering Phases 1 to 4 of the implementation.



For the purpose of establishing a consistent and scalable volume pricing model, the financial proposal also includes a global rollout scenario. This scenario provides indicative pricing based on the assumption that the solution will be progressively extended to the above-mentioned regions during the term of the agreement.

This forward-looking pricing model reflects:

- A volume-based pricing approach, allowing for economies of scale;
- Deployment hypothesis in multiple regions
- Customized number of subscriptions by country

5.2 Financial proposal structure

The pricing structure under this Order Form consists of the following three (4) main components:

- Cloud Services – Activation is required separately for each Region.
- Demand Planning Module – Activation is also required separately for each Region.
- User Access Fees – Based on the number and type of user profiles assigned.
- Customer success support – Scope detailed in Exhibit 4A

5.2.1 Cloud Service and Demand Planning Module

For operational and data management purposes, each designated region will be required to install a separate instance of the Company's solution. This regional instance approach ensures localized configuration, performance optimization, and data segregation aligned with specific business and regulatory requirements. Each instance will operate independently but in accordance with the global implementation framework established for the Demand Planning module.

The pricing outlined below for the Cloud Services and Demand Module is based on the designated regions and covers all countries within each specified region.

	APAC	EU+ME *	LA
	12 countries	28 countries	12 countries
Cloud service	27 627 USD	27 627 USD	22 101 USD
Demand module	23 680 USD	19 733 USD	19 733 USD

* Considering we can have EU and ME on the same region. This need to be review during roll out on these region

5.2.2 User Access Fees: Volume pricing model

Access to Company's application is managed through a role-based model consisting of three (3) distinct user profiles, each corresponding to defined levels of functionality and responsibility within the Demand Planning module.

Licenses granted under this Agreement are nominative, meaning they are assigned to specifically named individuals. While access rights may be transferred to another user (e.g., in the event of a staff change), concurrent or shared use of a single license by multiple individuals is strictly prohibited.

Full User Access	• Unlimited access to series, menus and calculations provided through the functional capabilities
Collaborative User Access	• Access to modification of data stored in times series • Access to validation.
Viewer Access	• Access to data visualization in reporting and dashboard.

This pricing model is designed to reward growth by reducing the per-license cost as your user base expands. Here's how it works:

- Pricing is divided into tiers based on the number of user licenses.
- When your total number of licenses reaches a new tier, all licenses (including previously purchased ones) will be billed at the new, lower rate starting from the next billing cycle.
- Any additional user licenses added during the current license term will be charged on a prorated basis. The prorated fee will be calculated based on the number of full months remaining in the annual license term from the date of activation of the additional license. The prorated amount will be added to the next billing cycle.

Example Scenario

- Abbott start with 10 Full access licenses → Tier 1 pricing: USD3552/user/year.
- Later, Abbott adds 20 more Full access licenses, bringing your total to 30.
- This moves Abbott into Tier 2.
- Starting from your next billing cycle (Quarterly adjustment), all 30 licenses will be billed at USD3339/user/year.

Volume-based pricing proposal by user profile (Per user per year):

Number of access	0-15	16-30	31-45	46-60	61-80	>81
Full access	USD 3,552	USD 3,339	USD 3,126	USD 2,913	USD 2,771	USD 2,664
% discount	0%	6%	12%	18%	22%	25%
Number of access	0-100	101-150	151-200	201-250	251-300	>300
Collaborative access	USD 237	USD 223	USD 208	USD 194	USD 185	USD 178
% discount	0%	6%	12%	18%	22%	25%
Number of access	0-20	21-40	41-60	61-80	81-100	>100
Viewer access	USD 118	USD 111	USD 104	USD 97	USD 92	USD 89
% discount	0%	6%	12%	18%	22%	25%

Estimated number of users by region/ country

The number of user licenses specified in this Agreement is indicative and intended for initial planning purposes. The final number of users will be reviewed and adjusted in alignment with the specific operational requirements of each country as the implementation progresses. Any

adjustments will be reflected in the corresponding subscription fees, based on the applicable user profiles and pricing structure

Phase 1 proposal:

	Region APAC	PHASE 1		
	Core + PH	2 Admin, 1 Full, 10 collaborator , 2 viewer		
	FM Cloud Service	Quantity	Price in USD /year	Total price in USD/Year
Core	Cloud value service	1	USD 27,627	USD 27,627
	Demand/Replenishment module	1	USD 23,680	USD 23,680
	FM admin (1 minimum)	2	USD 3,552	USD 7,104
	Customer success support	12	USD 868	USD 10,419
			Sub total Core	**USD 68,830**
PH	Full user access	1	USD 3,552	USD 3,552
	Coollaborator access	10	USD 237	USD 2,368
	Viewer access	2	USD 118	USD 237
	Customer success support	1	USD 868	USD 868
			Sub total Core	**USD 7,025**
			Total in USD /Year phase 1	USD 75,855

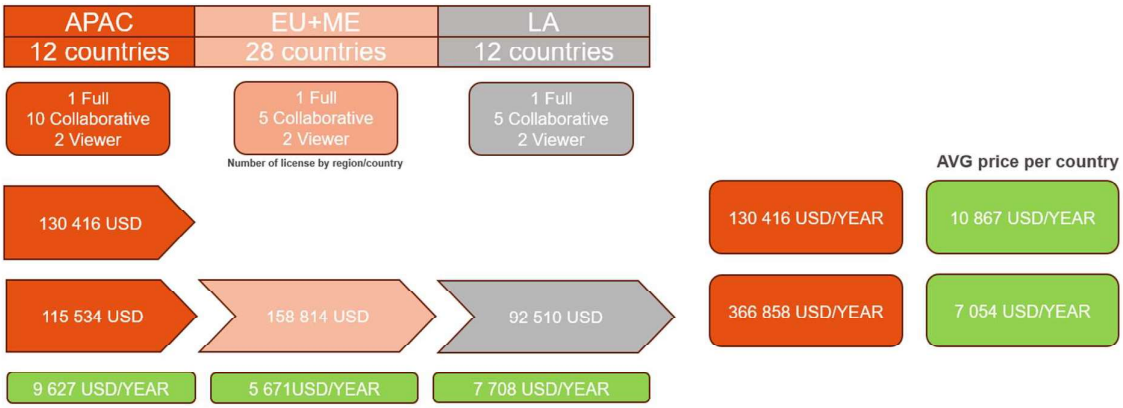
Phase 2 proposal estimation:

Phase 2 : 3 countries	Full user access	3	USD 3,552	USD 10,656
	Coollaborator access	30	USD 237	USD 7,104
	Viewer access	6	USD 118	USD 710
	Customer success support	3	USD 868	USD 2,605
			Sub total Core	**USD 18,470**

The activation of the SaaS Subscription Services for Phase 2 is contingent upon the successful completion of Phase 1, including the go-live of the solution in the Philippines. Phase 2 will only commence upon formal written approval from Abbott, confirming their intent to proceed based on the evaluation of Phase 1 outcomes. No subscription fees related to Phase 2 will be incurred until such approval is granted.

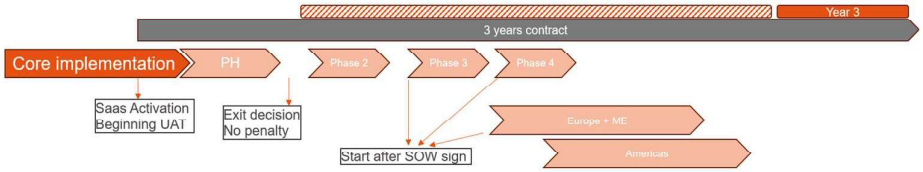
Initial estimates for user access and associated licensing are provided for planning purposes only. These estimates may be reviewed and adjusted if additional access is required to support operational needs in any country. Any such adjustments will be mutually agreed upon and documented in an updated subscription reflected in a new Order Form.

Indicative Full roll out estimation:



5.3 Rollout and SaaS Activation

The deployment of any new rollout phase will commence only after the signature of the associated Statement of Work (SOW) for that specific phase. In the event the number of countries participating to rollout scope for Phase 2 is adjusted, the Order Form and the Statement of Work (SOW) shall be subject to review and mutual agreement between the parties.



Payment terms SAAS phase 1			
Description	terms	quaterly price	Action
End Design phase 1	quaterly	USD 18,964	SAAS invoiced
Beginning UAT			SAAS subscription start

For the upcoming phase of the project, the quarterly SaaS subscription shall be invoiced at the beginning of the phase. The corresponding subscription services shall commence one (1) month after the invoice date.

5.4 Production and test environment

As part of the project delivery, Company will provide two environments: a Production environment and a Test environment. The Test environment is intended to support configuration, validation, training, and acceptance testing activities during the implementation phase. This Test instance will be hosted on the same cloud infrastructure (AWS) and will be subject to daily automatic shutdown procedures outside of standard working hours, to optimize resource usage.

The Test environment may require synchronization between Company and Abbott if specific activities or testing are planned, to ensure availability and performance. Upon completion of the implementation project and go-live of the Production environment, the Test instance will be deactivated, and access will be discontinued unless otherwise agreed in writing. Any request to maintain the Test environment beyond the project phase will be subject to separate commercial and contractual arrangements.

5.5 Order Form Renewal Conditions

At the end of the Initial Term, the Parties must agree upon and sign a new Order Form to continue the Subscription Services, unless either Party provides written notice of termination at least three (3) months prior to the renewal date. The Functional Manager (FM) shall issue a formal reminder to Abbott to initiate renewal discussions at least three (3) months before the expiry of the Order Form. Any changes to pricing shall be made in accordance with the terms set out in the Agreement.

5.6 Payment Terms

The SaaS subscription fee will be invoiced on a quarterly basis throughout the term, in accordance with the payment terms specified in the Agreement.

5.7 Exit Terms

Abbott may terminate this Order Form without penalty or further commercial obligations under the following condition:

- ✓ A formal decision is made to discontinue the project following the completion of the Phase 1 implementation in the Philippines. In such a case, all costs incurred up to the date of the discontinuation decision shall remain payable by Abbott. These include, but are not limited to:
  - Implementation services rendered, and
  - SaaS subscription fees incurred between the start of User Acceptance Testing (UAT) and the formal discontinuation decision date.

If Abbott decides to continue with the project, and Abbott subsequently terminates this Order Form early during the three (3) year term, the following exit penalties shall apply:

- If termination occurs within the first twelve (12) months, the penalty shall be equivalent to one (1) year of the SaaS subscription value.
- If termination occurs after the initial twelve (12) months, the penalty shall be reduced to six (6) months of the SaaS subscription value.

The applicable subscription value shall be based on the service fees in effect at the time of termination.

6 Third Party Service
Not Applicable

7 Mobile Applications
Not Applicable

8 Artificial Intelligence
Company's SaaS solution includes a Machine Learning functionality, which has been reviewed and formally approved by Abbott.

9 Additional Service Levels and Security Requirements. Company shall meet or exceed the service levels set forth in the Subscription Service Level Agreement and security requirements set forth in the Agreement.

NOTE: The legal commitment of funds from Abbott for this Order Form is only conveyed by the issuance of a fully executed Abbott Purchase Order. Signatures on this document do not authorize commencement of chargeable work for this project.

Reviewed and approved for content, charges and expenses.
